AKF series MTP®/MPO Cassette

SPECIFICATIONS

SC and LC are available. PC, SPC, UPC and APC polish meet standard requirement. Each module supports up to 12 fibers using MTP®/MPO, or 24 fibers using LC. Low loss MTP® connectors (Elite series) are deployed upon request. Bend-insensitive fibers are available too.

Method A, B, C are all available
MTP®/MPO cassette: male (female available on request)

Weight: 0.4KG

FIBER COMPATIBILITY

OM2, OM3, OM4, OS1/OS2

APPLICATIONS

Provide interconnect and cross-connect of applications over installations in entrance facilities, telecommunications rooms, data centers and at desk. Allows easy migration from 10G to 40G or 100G

OM2 (50/125um): for LED or laser-based propagation
OM3 & OM4 (50/125um): for VCSEL-based propagation
OS1/OS2 (9/125um): Laser-based propagation

In June 2010, the IEEE published new standards for answering Ethernet speeds of 40Gbps for server and computing applications and 100Gbps for network aggregation applications. IEEE 802.3ba responds to the demand of many data centers and enterprise requiring speeds beyond 10Gbps. IEEE 802.3ba specifies that communication medium is performed across copper, MMF and SMF. CP's 5S solution (Safety +, Space +, Speed +, Savings + and Service +) provides the efficient pre-terminated 40/100G laser optimized Multimode system, as is an ideal migration path to 40/100G speeds from 10G and meets the new IEEE 802.3ba standard. The system features pre-terminated trunks, harness, array cords and MTP®/MPO cassettes to assist you in future proofing your networks.

SC/PC adaptor is different from SC/APC ?

The most visible difference between the two adapters is color. Most single mode SC/PC adapters are blue and SC/APC adapters are green. This allows for quick identification, especially when used in distribution panels so the end-user inserts the correct connector type. Often users cannot see the connector plugged in on the backside of the panels, therefore the color indicates the SC connector that's required. SC connectors correspond with the adapter; most single mode SC/APC connectors have green outer shells while single mode SC/PC connectors have blue outer shells. SC/APC adapters use premium zirconia split sleeves to achieve the tightest tolerance possible providing critical alignment of the two angle polished ferrules. Whether it is a single mode SC/PC or SC/APC connector be sure to choose a zirconia (ceramic) sleeve material rather than a phosphor bronze or polymer. The zirconia alignment sleeves have a tighter tolerance and better elasticity, maintaining tight tolerances after several mating. In short, the adaptor is the same but just different in housing color.

Left to Right: LC Duplex adaptor x 6pcs (12 ports), SC duplex adaptor x 6pcs (12 ports), LC Quad adaptor x 6pcs (24 port), LC Quad adaptor x 6pcs (24 port, vertical type is for high density cassette, up to 120 port x LC)

1. MTP® adaptor: A type key up to key down, 2pcs
2. Top Case: 1.5mm thickness, SPCC, BK (RAL9005)
3. Bottom case: 1.5mm thickness, SPCC, BK (RAL9005)
4. Plunger: 2pcs, Black color
5. LC adaptor: 6pcs, MM, LC quad (SC footprint), w/Zr. sleeve
6. Screw: 16pcs, M2.0 x 6.0 Zinc Plated, Black color
7. MTP® dust cover: 2pcs, Black color
8. Screw: 2pcs, M3.0 x 4.0/4.5mm Zinc plated
9. Harness patch cord (APE series): 2pcs, MTP® (male) to LC OM3 12C x 2, 30cm

1. Top Case: 1.5mm thickness, SPCC, BK (RAL9005)
2. Bottom case: 1.5mm thickness, SPCC, BK (RAL9005)
3. Plunger: 2pcs, Black color
4. LC adaptor: 6pcs, MM, LC duplex (SC footprint), w/Zr. sleeve
5. MTP® adaptor: A type key up to key down, 1pc
6. Screw: 14pcs, M2.0 x 6.0 Zinc Plated, Black color
7. MTP® dust cover: 1pc, Black color
8. Screw: 2pcs, M3.0 x 4.0/4.5mm Zinc plated
9. Harness patch cord (APE series): 1pc, MTP® (male) to LC OM3 12C x 1, 30cm

LGX TYPE

AIU series Fiber Enclosures

SPECIFICATIONS

- ✓ Compliant with EIA 19" cabinet
- ✓ Sliding tray with front and rear stop glides forward and backward providing accessibility to front and rear of bulkhead after installation
- ✓ Convertible ear support recessed depth, up to 60mm
- ✓ A variety of removable pane faces
- ✓ Optional cable management tray

FIBER CAPACITY

Maximum LC: 120pcs
Maximum MTP®/MPO: 384 core

APPLICATIONS

Physical protection of fiber connection and storage of fiber slack

This series is designed to increase flexibility for any environment in data center. Stylish and innovative design is ideal for today's most advanced networks and setting. One-piece removable panel face supports both cassette and flush-mount adaptor bulkhead for easy of moves, adds and changes. Accepts 3pcs x LGX cassette or 5pcs High Density cassette. The maximum capacity is 120pcs x LC (one HD cassette: 24pcs x LC, 24pcs x 5 = 120pcs). Optional cable management trays help route and organize cables on enclosures. Because the trays can be mounted directly to the front of the enclosures, they do not require additional rack space. With the convertible ears, this panel facilitates the recessed depth, up to 60mm. Sliding tray glides 45 degree forward (with stop) and backward, and removes for easy field terminations and splicing.

OPTION 1 : 3pcs x LGX cassette or adaptor panel

OPTION 2: 5pcs x HD cassette or adaptor panel

OPTION 3: flush-mount adaptor bulkhead for ST, FC, SC and LC

One-piece removable panel face

Convertible depth: up to 60mm

Optional cable management trays can be mounted directly

Order Information

Panel Type	Part Number	Spec Description
3 Cassette Panel with support bar	AIUNC0000000001	Metal, Advanced Fiber Patch Panel, for Cassette LGX Type, 3P w/ Support Bar, BK,
5 Cassette Panel with support bar	AIUNE0000000001	Metal, Advanced Fiber Patch Panel, for Cassette HD Type, 5P w/ Support Bar, BK,

Ultra Slim Fiber Enclosure series 96 & 144 port

SPECIFICATIONS

1 U panel can scale up to 96 and 144 discrete LC connectors and up to 8 and 12 x MTP®/MPO

FIBER COMPATIBILITY

OM1, OM2, OM3, OM4, OS1/OS2

APPLICATIONS

Data communication and data center infrastructure and fiber channel for storage area network

OM1 (62.5/125um): for LED-based propagation
OM2 (50/125um): for LED or laser-based propagation
OM3 & OM4 (50/125um): for VCSEL-based propagation
OS1/OS2 (9/125um): Laser-based propagation

This series supports extraordinary advantage:

- ✓ 1U size up to 144 port: 13cm depth saves space and makes the Panel compatible with copper racking system
- ✓ Rapid Deployment: Factory terminated modular system saves Installation and reconfiguration time during moves, adds and Changes
- ✓ Reliability-100% tested: Combination of high quality components and JE manufacturing quality control guarantees product to the highest standards

Flexible option : Protrude or Inner version

Protrude version

Inner version

Rear side: LC x 96 port with MTP®/MPO x 8pcs

Sliding Fiber Enclosure

SPECIFICATIONS

Flexible panel face option supports flush-mount adaptor bulkhead for easy of moves

FIBER COMPATIBILITY

OM1, OM2, OM3, OM4, OS1/OS2

APPLICATIONS

Data centers, premise installations, telecommunication networks. Ethernet, Fiber Channel, ATM, LAN, MAN and LAN and also for indoor application

OM1 (62.5/125um): for LED-based propagation

OM2 (50/125um): for LED or laser-based propagation

OM3 & OM4 (50/125um): for VCSEL-based propagation

OS1/OS2 (9/125um): Laser-based propagation

This innovative, robust 1U sliding patch panel has been designed to accept 48 fibers housed within a 1U space. With the flexibility to sue a full array of adaptor types offering a convenient solution to the end user, enabling them to incorporate a multi-functional panel which allow easy access during installation or re-work with no disturbance of the existing cable or fibers.

This series features a tray that slides out from the left side to the right, providing easy access to fiber connections and allowing removal of the entire tray to be placed on a workable for more convenient termination.

APA series LC Uniboot Patch Cord

SPECIFICATIONS

Uniboot is only for LC. PC, SPC, UPC and APC polish meet standard requirement

FIBER COMPATIBILITY

OM1, OM2, OM3, OM4, OS1/OS2

APPLICATIONS

Provide interconnect and cross-connect of applications over installations in entrance facilities, telecommunications rooms, data centers and at desk

OM1 (62.5/125um): for LED-based propagation
OM2 (50/125um): for LED or laser-based propagation
OM3 & OM4 (50/125um): for VCSEL-based propagation
OS1/OS2 (9/125um): Laser-based propagation

APA LC uniboot series is integrated reverse-polarity uniboot duplex assembly that completely answers high-density requirements of the MDA and EDA. Compared with traditional duplex LC jumpers, uniboot series provides efficiently a 50-percent reduction in bulk cabling, including the improvement of cable management, air circulation and routing.

Incorporated with 3.0mm dualan cable (containing 2 x 0.9mm fiber), uniboot exclusively maximizes valuable space. The user regains control of the infrastructure rather than living with an unmanageable build-up of patch cords.

JE's LC uniboot supports A & B identification on both edges.

APA series LC + Bendable Boot

SPECIFICATIONS

LC is available. PC, SPC, UPC and APC polish meet standard requirement

FIBER COMPATIBILITY

OM2, OM3, OM4, OS1/OS2

APPLICATIONS

Provide interconnect and cross-connect of applications over installations in entrance facilities, telecommunications rooms, data centers and at desk

OM2 (50/125um): for LED or laser-based propagation
OM3 & OM4 (50/125um): for VCSEL-based propagation
OS1/OS2 (9/125um): Laser-based propagation

APA LC bendable boot series is designed to bend and maintain desired angle or direction. With a single stainless steel wire inside the boot, it is easy and convenient to be bended by hand, without any tool. Incorporated with ultra-bendable fiber cable, G657A1 and G657A2, this series maintains the stable performance and supports a minimum bend-radius of 10mm within minimal bend-induced attenuation loss. In data center, the network transmission increases rapidly, available margins tighten greatly and becomes sensitive to loss incorporated with a number factors. Bend is one of them. Attenuation loss, with neglecting bends, may be reduced 50% when using LC bendable series, it protects a system outage from severe bending problems.

All outer housing and connector body are color-coded in accordance with ANSI/TIA/EIA-568-C.3

Loopback MTP®/MPO

SPECIFICATIONS

MTP® and MPO available in both 12- and 24-fiber configurations.

FIBER COMPATIBILITY

OM3, OM4, OS1/OS2

APPLICATIONS

Device burn-in and loopback testing for network cards and QSFP modules. By creating a loop of signal from transceiver to receiver within one MTP®

MPO plug it forms optical link which allows testing of optical network segment by segment.

This series is driven by both network systems-solutions providers and the optical-device community that provide and design transceivers or active components. Exclusive housing design allows side-by-side mounting in dense board applications. With standard or custom pin-outs, this series can accommodate specific optical routing needs. Factory terminated and tested connections guarantee maximum channel throughput without the performance variability of field terminations.

1. MTP®/MPO connector: Female
2. Loop Back Connector Housing kit, 2pcs, plastic PC material, black color
3. Performance:
 - Insertion Loss & Return loss: MM <1.5dB SM APC <1.5dB
 - Fiber overcut: 1.0~3.0um
 - Operating Temperature: -20°C to + 70°C
 - Storage Temperature: -40°C to + 80°C
